

Unified Communications as a Service

Transforming Businesses Through Technology

With investment capital restricted and the workforce becoming more distributed, corporations are looking for solutions to replace on-premise communication infrastructure as it reaches end-of-life. Unified Communications as a Service (UCaaS) offers a cost-effective and efficient alternative to traditional on-premise systems. UCaaS eliminates the need for capital investment in hardware and software, simplifies ongoing maintenance and management, and reduces demand on internal IT resources while improving scalability and providing essential continuity during outages.

“Through their extensive knowledge in the UCaaS field, MNJ asked the right questions and provided professional guidance throughout the entire process of evaluating alternatives to our current VOIP system. Due to an overall exceptional experience, we are already working on our next project with the MNJ team.”

Lori Uldricks | Director, System Support | Dwellworks, LLC

Unified Communications as a Service (UCaaS) is a cloud-based communication technology that offers businesses an efficient and cost-effective way to handle all their communication needs. UCaaS includes voice and video calls, instant message conversations, unified SMS messaging, and more.

UCaaS enables employees to:

- Communicate and collaborate anywhere in the world
- Use virtual numbers to maintain control and secure customer communications
- Receive calls and messages on desktop phones, computers, or mobile devices
- Have calls automatically find employees even when they're out of the office
