

Advanced Build & Config Services

Transforming Businesses Through Technology

Proper hardware and software configuration takes time and slows down deployments. MNJ will prepare your hardware and software and have it arrive at your door, ready to use!

MNJ ADVANCED BUILD & CONFIG PRACTICE

Tailoring your technology to your organization's needs requires custom configuration. This is where MNJ's Advanced Build & Config Services can help.

Custom Imaging:

Experience complete integration and gain direct control with MNJ's Custom Imaging Solutions. Services include:

- Disk-based (static) image creation, maintenance, and deployment.
- Customizable options such as domain join, security upgrades, and hard drive encryption.
- Complete solution deployments such as Microsoft System Center Configuration Manager plus Operating System Deployment (SCCM + OSD) or Microsoft Deployment Toolkit (MDT).

Network and Security Device Configuration:

We configure firewalls, routers, switches, access points, and IP phones for all major manufacturers, based on your organization's unique specifications.

Rack Configuration:

Reduce downtime and onsite configuration expenses by having our technicians mount and configure network and security devices, rack-mount servers, chassis blade servers, storage, KVMs, UPSs, and PDUs.

FOCUS MORE RESOURCES ON YOUR CORE BUSINESS

INCREASE BUSINESS TRANSFORMATION VELOCITY

IMPROVE SECURITY

Benefits of MNJ's Advanced Build & Config Services

Resource Availability

In-house staff are unlikely to have the time necessary for a configuration project, resulting in slower, less efficient deployments. Plus, configuration takes time away from higher-level projects.

Skilled Engineers

It's imperative that the people who manage your configuration be experienced and deeply knowledgeable. If they're not, you can easily fall off schedule, leading to loss of revenue and productivity.

Streamlined Ordering

Order products via our simple self-serve portal. Your account manager will match your orders with custom requests based on your configuration requirements.

Multi-Site Logistics

Organizations with multiple locations must send their configuration teams to each of their sites or ship their devices to secondary locations after configuring them in-house. This is a financial and logistical headache. MNJ will handle these logistics for you from our centralized Build & Config Center.

Quality Control

MNJ utilizes a quality control process to ensure your products are properly configured and imaged. We ensure your product arrives fully configured, tested, and ready to get to work.

CONFIGURED, ASSEMBLED, DELIVERED

MNJ's Advanced Build & Config Services provide hardware and software configuration to meet your business needs and save time and money by delivering a solution that is ready to use out of the box.

About MNJ

MNJ is a leading Digital Transformation and IT Solutions Provider. We'll keep you ahead of the curve with our proven practice areas, focus on customer success, and extensive partner ecosystem.
