

Managed FinOps Service

Transforming Businesses Through Technology

Organizations with cloud infrastructure can struggle to budget, forecast, and manage consumption costs. IT and Finance teams combined may not have the experience needed to fully optimize costs.

Whether your cloud infrastructure is in AWS, Azure, OCI, or GCP, MNJ's team can fill that knowledge gap and strengthen your ability to make great business decisions with our Managed FinOps Service.

FinOps, short for financial operations, is a collection of practices that leverages cross-functional teams across Finance, IT, and business units to optimize cloud spending, aligning it with key business objectives. In addition, FinOps strives to provide stakeholders with greater financial visibility, control, accountability, and predictability.

MANAGED FINOPS SERVICE

MNJ's Managed FinOps Service addresses these challenges, working with you to ensure goals are achieved. Our FinOps Managed Service delivers:

Budgeting Support

We collaborate with key IT and Finance stakeholders to understand your goals, plans, and initiatives to create baseline and zero-based budgets for your business.

Forecasting Support

MNJ will forecast/forecast cloud spend monthly.

Cost Optimization

MNJ will leverage our toolset, 9-Step Cost Optimization Process, and hands-on expertise to discover, create, and implement cost optimization opportunities.

Governance and Visibility

MNJ will drive the resource tagging standards and governance needed to make data analytics possible and present our findings so they can be understood and proactively acted upon.

DEPLOY NEW SOLUTIONS FASTER

REDUCE COSTS

ENABLE GREATER SCALABILITY

FOCUS MORE RESOURCES ON YOUR CORE BUSINESS

INCREASE BUSINESS TRANSFORMATION VELOCITY

IMPROVE SECURITY

Benefits of MNJ's Managed FinOps Service

Improved Cost Allocation

You'll gain visibility into who is spending how much on which resources and accurately present or charge back costs to each business unit as appropriate.

Improved Cost Control

Governance, along with automation, provides the guardrails required to restrict the provisioning of new resources as appropriate.

Optimized TCO

You'll recognize new cost savings through redesigned workloads, provider programs, more favorable pricing models, elimination of abandoned resources, and other cost-saving methods.

Improved Transparency

Through reporting and regular business meetings with IT and Finance sponsors, cloud investment stakeholders will be aware of how funds are being leveraged.

Improved Accountability

Track and report data around cloud usage and costs to help hold cloud environment managers accountable for their spending.

Improved Cost Predictability

We use financial modeling powered by cloud providers and third-party tools to better predict costs, set budgets, and create accurate forecasts.

MAKE BETTER-INFORMED BUSINESS DECISIONS

Optimize cloud spending and align it with key business objectives with MNJ's Managed FinOps Service.
